

Testimonial of Trish Fulkerson

I would like to say that I have always been one to do what is right. When I was being sexually harassed I did try to stand up for myself, but ultimately I ended up losing my job. At the time it was devastating to my ego, self esteem, self respect, and even being independent. I thought to myself there is no way I can ever pick up & recover from this very devastating thing that people can put you through.

Even though I knew nothing about the legal system, I was not going to let that company get by with what they had done. I was scared. I did not want to have my name or my family's name be trashed & drug through the dirt or even on the news. I was so ashamed I did not want people to know!

I made one call and met with Mr. Thomas Newkirk. I was so embarrassed to tell him the details. He was so understanding, patient and very professional. I knew there was no other person I could trust to treat me as a human being & handle this case with dignity and privacy. I was treated like I mattered, and my case was handled with care!

I can never repay Tom & Paige for what they did. They never forgot me in all the mess, and they made sure my best interests always came first. I never felt that I did not matter. If you really want someone to stand up for your rights there are two individuals I know from first-hand experience who will do just that—Tom Newkirk & Paige Fiedler!
